

AMEPOWER

BENEFITS & CAPABILITIES

- Latest IGBT Technology Deployment
- State-Of-The-Art Programmable Gate Driver Unit
- Optimized IGBT Switching Behavior
- Smart Interface Board
- Robust Technical Documentation & Production Status
- Optimized Manufacturing Processes (Awarded Top 3 Manufacturer of the Year by South Florida Manufacturer's Association)
- Pulse Test up to 4KVdc 3000A and above
- Continuous Testing @1500Vdc 300KW
- Configurable/Automated Test Benches
- FEA Simulations
- Advanced Board Repair, Re-Design and Reverse Engineering

AmePower is an industry-leading company with over 20 years of specialized expertise in manufacturing and power electronics equipment.

One of Florida's top manufacturers, AmePower is an award-winning Contract Manufacturer with the expertise and technical capabilities needed to support Power Electronics Designs, with Engineering, Manufacturing, Testing, Logistics, and After Sales Technical Support.

AmePower's 44,000 sqft. State-of-the-Art facility is complete with in-house high power testing capabilities and high-tech equipment and components. Our new and up to date components prolong the lifecycle expectancy and combat obsolescence - which translates into increased reliability and cost reduction long term. As a Buy America compliant manufacturer with multiple ISO certifications, we ensure quality and compliance for each project.

44,000 sq ft State-of-the-Art design, manufacturing and testing facility
